From F Schiemer : The Importance of Aquatic-Terrestrial Ecotones for Freshwater Fish (Developments in Hydrobiology) The Importance of Aquatic-Terrestrial Ecotones for Freshwater Fish (Developments in

Hydrobiology):

Ecotones are interface zones between different ecosystems Their ecological role and significance with regard to ecological management and conservation has become increasingly appreciated For the management of freshwater resources for example an improved understanding of the role of land inland water interfaces will be essential for reducing negative human impacts by engineering nutrient loading siltation etc The management of ecotones on the other hand
