Farmed fish quality is a developing area of concern and has been described as the aquaculture issue of the next decade. Fish product quality is inherently amenable to influence or control throughout the whole production chain and successful production of good quality fish and fish products is dependent upon the expertise of a wide range of scientists and practitioners from academia and industry. This important and most timely book has arisen from an international conference. **Farmed Fish Quality** is a welcome addition to the literature. It encompasses a very broad range of information and will become a key reference in this field. **Fish and Fisheries From the Back Cover The flesh**
