By Sandra Markle : Great White Sharks (Animal Predators) great white sharks are the largest predatory fish often thought to be man eaters they are actually responsible for only five to 10 attacks on humans per year when a great white shark is born along with up to a dozen siblings it immediately swims away from its mother baby sharks are on their own right from the start and Great White Sharks (Animal Predators):

2 of 2 review helpful very good introduction to great whites AND books for 9 12 year olds By Robert W Smith This book contains excellent photographs of sharks It discusses in some detail great white sharks their physiology predatory tactics prey and birthing It is usually 1 page of photo and 1 page of a couple sentences that describe the photo It s so well written that it feels like a story I was disappointed Fearsome predators lurk around every corner in rivers grasslands oceans and forests With stunning photographs of animals on the hunt this series focuses on some of the most skillful hunters in the animal kingdom Readers will be fascinated how these animals track and kill their prey
